EDUCATION

B.Tech in Information Technology

2024 – 2028

KJ Somaiya School of Engineering

CGPA: 9.7 / 10 (Till Sem 4)

EXPERIENCE

Envision Next

Turbhe, Maharashtra

Full Stack Developer & Software Development Engineer in Test (SDET)

May 2026 – Jul 2026

- Developed and debugged Ruby on Rails applications using PostgreSQL, Redis, Hotwire, Tailwind CSS, and Alpine.js to deliver production-ready features.
- Built automated RSpec and Playwright test suites, leveraging GitLab CI/CD, FactoryBot, and TDD to improve regression coverage and software reliability.

ISTE KJSCE

Web & Tech Team

Web Developer

- Developed and maintained production websites for college events using HTML, CSS, JavaScript, React, and Git.
- Collaborated with design and event teams to deliver responsive, production-ready web applications.

Inventory Management System (under Prof. Nandana Prabhu)

Academic Project

- Developed a web-based inventory management system using HTML, CSS, JavaScript, Google Sheets, and Google Apps Script for real-time inventory tracking.
- Automated inventory updates and reporting by integrating Google Apps Script with Google Sheets, reducing manual data management.

PROJECTS

Rapid3 | Python, Redis, Next.js, Supabase

- Developed a browser extension and web application that detects phishing and malicious content across URLs, emails, SMS, and audio using machine learning.
- Developed an ML-powered browser extension and web application for phishing detection across URLs, emails, SMS, and audio.

GlobeX | Solidity, Ethers.js

- Developed a blockchain-based supply chain platform using Solidity and Ethers.js.
- Developed smart contracts for secure record-keeping and end-to-end product traceability.

Farm To Fork Using Blockchain | Solidity, Ethers.js

- Developed a blockchain-based supply chain platform using Solidity and Ethers.js.
- Developed smart contracts for secure record-keeping and end-to-end product traceability.

TECHNICAL SKILLS

Languages

C++, C, Python, Java, Go, Ruby, Solidity

Frameworks & Technologies

HTML, CSS, JavaScript, React, Node.js, Express.js, Ruby on Rails, Ethers.js

Databases

PostgreSQL, MongoDB

Developer Tools

Git, GitHub, Firebase, Google Apps Script, Chatbase

HACKATHONS AND COMPETITIONS

- **CodeChef- 2★ Competitive Programmer (Rating 1400+)**
- **SIH 2026** - 2026 Smart India Hackathon National-Level PPT Round Shortlisted Team
- Ranked Top **3000** out of 50,000+ participants in **ICPC India Regional Programming Contest (IICPC)**
- **AgriTech Hackathon** – Built a blockchain-based app connecting farmers, distributors, and sellers
- **HackX** – Built an AI-powered vocal coach that provides real-time singing feedback.
- **Google Developer Groups** – Developed a Railway Concession App to digitize approval workflows
- **Neural Nexus** – Built Rapid3, an ML-based sandbox system to detect and block phishing
